GitHub: github.com/danielclara13

ABOUT ME

Software Developer with a solid foundation in systems programming and 2+ years of professional experience building secure, scalable solutions for the banking and financial sector. I specialize in bridging complex hardware systems and modern software architectures — backend APIs (C#/.NET, Clean Architecture), hardware integration via dedicated SDKs, and modular Android apps in Kotlin and Java. Currently pursuing a degree in Computer Engineering at ISCTE while working full-time at GoodPartner. Available for freelance and contract work, and open to new opportunities.

LANGUAGE SKILLS

Mother tongue(s): Portuguese

Other language(s):

English

LISTENING B2 **READING** B1 **WRITING** B2

SPOKEN PRODUCTION B1 **SPOKEN INTERACTION** B1

German

Currently learning — A1 (beginner)

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

WORK EXPERIENCE

GOODPARTNER - Comércio de Equipamentos de Automação, Lda – Sintra, Portugal

Address: Rua Charneca de Cima Bloco 2, Armazém O, Ral, 2710-456 Sintra (Portugal) | **Website:** https://www.goodpartner.pt/ | **Email address:** info@goodpartner.pt

Junior Software Engineer

[20/07/2024 – Present]

Development of Secure and Scalable Software Solutions for the Banking Sector

Bridging hardware integration, backend services and modern modular architectures.

Key Responsibilities and Achievements:

- **Backend and API Development:** Design and built-from-scratch of a scalable API using *Clean Architecture* principles. Implementation of robust data flows and business logic using DTOs, *Mappers*, Service layers and *Repositories*, backed by a MySQL database.
- **Hardware and Systems Integration:** Development of desktop applications in WinForms (.NET) for direct communication with smart deposit machines. Engineering of a dedicated API for SDK integration, ensuring secure and seamless communication between the software and the physical deposit hardware.
- **Mobile Development:** Building and maintenance of modular Android applications for payment/service terminals using Kotlin and Java, with a focus on scalability, code separation and high performance.
- **Agile and DevOps Practices:** Active collaboration in an Agile (Scrum) environment to ensure iterative and reliable software deliveries. Integrated work in active CI/CD *pipelines* to optimize integration and deployment flows.
- **Continuous Improvement:** Use of *AI pair programming* tools to improve code quality, solve complex problems and accelerate the development cycle.

Technology Stack: Kotlin, Java, C# (.NET), MySQL, WinForms, Clean Architecture, Modular Architecture, REST APIs, Android SDK, CI/CD, Scrum, AI Pair Programming.

EDUCATION AND TRAINING

Bachelor's Degree in Computer Engineering

ISCTE – University Institute of Lisbon [09/2025 – Present]

City: Lisbon | **Country:** Portugal | **Website:** https://www.iscte-iul.pt | **EQF level:** EQF Level 6

Technical Course in Management and Programming of Computer Systems

Escola Profissional Gustave Eiffel [2021 – 2024]

City: Amadora | **Country:** Portugal | **Website:** https://gustaveeiffel.pt | **EQF level:** EQF Level 4

SKILLS

Languages	Kotlin, Java, C# (.NET), JavaScript, PHP, SQL, HTML, CSS
Backend & Web	ASP.NET Core, Entity Framework Core, REST APIs, Laravel, WordPress
Mobile	Android SDK (Kotlin & Java), Android Studio
Databases	MySQL, SQL Server
Architecture	Clean Architecture, Modular Architecture, DTOs / Mappers / Repositories
Tools & DevOps	Docker, CI/CD, Git, Scrum / Agile, AI pair programming
Other	Hardware & SDK integration, Web hosting & CMS management, Microsoft Office

PROJECTS

Payment & Order Management API — .NET 10 Reference Architecture

[07/2026 – 08/2026]

Enterprise-grade RESTful API built as a Proof of Concept and reference architecture for e-commerce order management, focused on maintainability, scalability and strict separation of concerns without external dependencies for core business rules. Built on Clean Architecture (Domain, Application, Infrastructure and API layers) with .NET 10 (native UUIDv7), .NET Aspire for container orchestration and observability, central global exception handling, AutoMapper DTO mappings, FluentValidation and Entity Framework Core migrations over MySQL, plus an automated GitHub Actions CI/CD pipeline with xUnit/NSubstitute testing.

Tech: C#, .NET 10, ASP.NET Core, Clean Architecture, EF Core, MySQL, .NET Aspire, AutoMapper, FluentValidation, GitHub Actions, xUnit | github.com/danielclara13/payment-ecommerce-api

GigaTreasure — Web & Desktop Hardware Store (Final grade: 19/20)

[11/2023 – 06/2024]

Final course project (PAP): a web application for buying computer hardware, with a differentiating feature that suggests hardware upgrades to the user. A companion desktop app reads the user's computer specs and feeds them into the database to power those suggestions. Covered data modeling, web security fundamentals and protection against common attacks, and full project documentation.

Tech: ASP.NET, C#, SQL Server, Desktop app | github.com/danielclara13/GigaTreasure

Technological Project — Desktop Application (Final grade: 18/20)

[01/2023 – 06/2023]

Second-year course project focused on desktop development: data modeling and a WinForms application in C# backed by a SQL Server database.

Tech: C#, WinForms, SQL Server | github.com/danielclara13/Projeto-Tecnologico

DRIVING LICENCE

Categories: B, B1
